Future Internet Architectures: New Trends in Service Architectures (2nd Euro-NF Workshop and Future Internet Cluster Meeting)

June 9, 2009
Santander, Spain

Plenary and Closing Session

karin.hummel@univie.ac.at

University of Vienna

Panel and Closing Session

- Short panel discussion: Future Internet ~40 minutes

  Panelists: George Polyzos (AUEB, Greece), David Erman (Blekinge Inst. Of Technology, Sweden), Bernhard Klein (Univ. of Vienna, Austria), Jörg Ott (TKK Netlab, Finland)

- Closing remarks

Panel Statement: Trust

George Polyzos (AUEB, Greece)

Panel Statement: Network Layering

David Erman (Blekinge Inst. Of Technology, Sweden):

Network layering is obsolete.

Panel Statement: Network Layering

Bernhard Klein (Univ. of Vienna, Austria):

Introducing sociology to networking: Benefit (better content dissemination) or threat to humans?

Panel Statement: Network Layering

Jörg Ott (TKK Netlab, Finland):

The mobile Internet: We are not connected any more!

What's Next?

- Your slides and the filled-in questionnaire → Gergö Lovasz
- Selection of contributions invited to submit a full, extended journal publication
  - Notification: latest end of June, 2009
  - Notification via email
- Journal: Special Issue of the Telecommunications Systems Journal (Springer US)
  - Submission: August 28, 2009
  - Notification of acceptance: October 15, 2009
  - Camera ready: October 30, 2009

- *Announcement: There will be a call for papers for a special issue in IEEE Network Mag. on the Future Internet (persons in charge: Prof. Kazem Sohraby)*

Thank you!
